Corona Firebrand's Divine Mandate: The Quest of the Solara Diamonds

Sunday, January 26, 2025 9:00 AM

The Call of Ignis Solara

Beneath the radiant altar of an open-air temple bathed in golden light, the ever-burning flame of **Ignis Solara** flared with divine intensity. Corona Firebrand, the devoted cleric and Fire Genasi, knelt with reverence as the voice of her goddess filled the sanctified air. The flame before her shimmered, reshaping into the visage of a fiery woman with molten hair, her eyes glowing with the eternal light of justice and creation.

"Corona, Kindled Soul, bearer of my light, hear my decree. The shadow of corruption spreads across the land. Necromantic forces defile the balance, raising the unholy in their dark designs. The purity of the living flame must be restored. You shall carry the Emberforge Reliquary, my sacred gift, to cleanse these blights. From the ashes of their destruction, you will forge Solara Diamonds, embodiments of divine renewal and radiant power. These holy gemstones will light the way and protect the innocent from encroaching darkness. This is my will; do you accept this sacred duty?"

The flame flared, waiting for her response.

The Emberforge Reliquary

The **Emberforge Reliquary**, entrusted to Corona, was a compact yet masterfully crafted artifact of holy design. Constructed from golden metals and crimson wood, it gleamed with radiant **Sunsteel** bands and bore the symbol of Ignis Solara—a golden flame encased in a perfect circle. The reliquary could incinerate the remains of undead creatures and compress their purified ashes into flawless **Solara Diamonds** over time. These diamonds were not only a testament to divine justice but potent tools for crafting holy artifacts and amplifying radiant magic.

The Mission

Ignis Solara's directive was clear:

- 1. Cleanse the Land of Undead:** Travel to sites overrun by necromantic forces, where undead creatures rise, and destroy their remains using the Emberforge Reliquary. Each purification would prevent the reemergence of these abominations for 24 hours and sanctify the surrounding area.
- 2. Create Solara Diamonds:** By compressing the purified ashes, Corona would craft Solara Diamonds, powerful gemstones imbued with Ignis Solara's divine essence.
- 3. Craft the Beacon of Renewal:** Ultimately, Corona's mission was to gather enough Solara Diamonds to forge the **Beacon of Renewal**, a legendary artifact capable of banishing necromantic corruption on a massive scale.
- 4. Protect the Innocent and Uplift the Downtrodden:** Along her journey, Corona was tasked with spreading hope, uniting fractured communities, and inspiring them with the radiant light of Ignis Solara.

Scene of Divine Empowerment

As Corona accepted the quest, the altar's flames surged, engulfing her momentarily without harm. The reliquary appeared before her, its metal warm to the touch, resonating with a faint hum of power. Ignis Solara's voice echoed one final command:

"The path will be fraught with peril. The undead will fight to preserve their defilements, and necromancers will seek to claim my reliquary. But remember, my light burns within you. Let it guide you to forge a new dawn for the world. Go now, my chosen. Kindle hope where only shadows remain."

The temple's flames dimmed to their eternal glow, and the reliquary's radiant aura illuminated Corona's path.

Its power is focused on maintaining balance, punishing those who raise the dead as abominations, and shielding the souls of the departed from exploitation. Mortals drawn to the Deathwarden often share its purpose: clerics, paladins, and even warlocks who see their pact as a sacred duty to preserve the natural order.

Most often, the Deathwarden manifests as an anthropomorphic jackal, resembling ancient depictions of death's guardians. Its fur is sleek and black, and its eyes glow faintly with a golden or white light. Regardless of form, its presence radiates solemn authority and unwavering justice.

Personality

The Deathwarden is stoic, impartial, and deeply protective. While it values the living, it believes all things have their time, and it does not intervene lightly. It is deeply opposed to necromancy, soul manipulation, and any actions that exploit the dead for personal gain. Compassionate yet firm, the Deathwarden encourages its followers to respect the natural cycle and act as arbiters when others stray from its path.

Flavor

The **Obsidian Shard** is said to be a fragment of the Deathwarden's first scythe, imbued with its lingering power. Its whispers guide Aloquin in fulfilling his pact, revealing hidden truths, binding enemies, and protecting the balance between life and death.

Aloquin's Motivations

Sunday, January 26, 2025 5:02 PM

Early Life

Aloquin Velshire grew up in the serene village of Vensborough, nestled in the rolling meadows on the outskirts of a distant kingdom. The village, though small, was tightly knit. Aloquin's family taught him the value of community early on. His parents, Maroen and Ellara Velshire, worked tirelessly to uphold the village traditions, while his maternal grandparents, Torric and Ysenna Thornbrooke, shared wisdom from their many years.

Aloquin had two siblings who shared his days of adventure: his elder sister Liraen and younger brother Casrin. The Velshire children were raised to believe that family extended beyond blood ties. To Aloquin, the villagers were an extended family—a network of care and mutual responsibility, even when disagreements arose.

The Village and Its End

Life in Vensborough was idyllic. The days were filled with laughter, hard work, and simple joys. Aloquin often ventured into the nearby forest to gather firewood or hunt small game. One fateful day, however, would change his life forever. While he was deep in the woods gathering kindling, a chill swept through the air. Unbeknownst to him, a necromantic force struck the village.

When Aloquin returned, he found only devastation. The once-lively streets were filled with the ashens remains of his neighbors, and an unnatural fog clung to the ground. Worse still, the spirits of the villagers were trapped, reliving the terror of their final moments in an unending cycle. His parents, siblings, and even his grandparents were among the haunted shades. The horror of their screams echoed in his mind.

The Deathwarden's Pact

As Aloquin stood amidst the ruins, paralyzed by grief and guilt, a figure emerged from the shadows—the Deathwarden. Appearing as a towering jackal-headed figure cloaked in flowing darkness, the patron spoke with a voice that resonated with solemn authority.

"Aloquin Velshire," the Deathwarden intoned, "your kin and community are bound to this place, held captive by the defilement of their death. Their rest has been stolen, but I offer you a path to redemption. Serve me as my hand in this world. Cleanse the defiled and release the trapped souls. Fulfill this task, and I will grant your village the peace they deserve."

Without hesitation, Aloquin agreed, though the full weight of the pact eluded him at the time. The Deathwarden laid out the terms: Aloquin must cleanse or free **1,021 souls** to fulfill his pact. Until that day, he would be bound to the Deathwarden's service, unable to find peace in death. Each time Aloquin falls, he rises with the dawn, his task unfinished. His body heals, but the scars of death remain as reminders of his failure to protect his village.

The Scars of Death

Aloquin bears the physical marks of his sacrifices:

1. A jagged scar across his chest where a blade pierced his heart.
2. A burn mark on his left forearm from a necromancer's spell.
3. A deep scar on his neck from being strangled.
4. A puncture wound on his side from a spear thrust.
5. A claw mark that stretches across his back from shoulder to hip.
6. A small but visible scar near his left eye from a glancing arrow.
7. A missing section of his right ear, the result of a brutal encounter with an undead beast.

Each scar tells a story of battle and sacrifice, etched into his flesh as a testament to his unyielding resolve.

Now

Aloquin wanders the world, fulfilling his grim task one soul at a time. Though haunted by the past, his determination burns brightly. Every soul he frees brings him closer to freeing his family and village. Despite the weight of his burden, Aloquin's moral compass remains steadfast, guided by the lessons of his childhood: care for others, even if the task is difficult, and protect those who cannot protect themselves.

To date, Aloquin has released 311 souls. Only 710 remain.

Physical Manifestations of the Pact:

Cold Aura - Aloquin's body radiates a faint, unnatural chill. Those standing near might, if their perception is high enough, notice a drop in temperature, as if the grave lingers near them.

Grave Speech - while invoking the gifts granted by the Deathwarden, Aloquin's speech carries ghostly whispers or echoes of tormented souls.

Mark of the Deathwarden - The sigil of the Deathwarden is etched onto Aloquin's back; an hourglass wreathed in black and white roses. It glows faintly when Aloquin invokes the gifts granted by the Deathwarden.

Narrative Implications

This structure leaves room for roleplaying moments of doubt or despair:

- **The Price of the Pact:** Your character's immortality or inability to die peacefully serves as a constant reminder of the pact's weight. They may feel isolated, knowing they cannot share in the peace they fight to give others.
- **Moral Choices:** Your character may wrestle with how far they are willing to go to fulfill the quota—what compromises they are willing to make and whether the end justifies the means.
- **Hope and Redemption:** Seeing their progress, the Deathwarden might offer glimpses of the redeemed soul to spur them onward, or the soul itself might appear as a fleeting specter in critical moments.

The character's death and subsequent return by the Deathwarden could leave profound and visible marks, both physical and metaphysical. These manifestations would reflect their unnatural connection to death, their ongoing pact, and the Deathwarden's influence over their existence. Here are ways this could manifest:

Physical Manifestations

1. **Deathly Pallor:** The character's skin takes on a pale, almost corpse-like tone, regardless of their original complexion. This pallor makes them stand out as someone touched by death.
2. **Cold Aura:** The character's body radiates a faint, unnatural chill. Those standing close might feel a drop in temperature, as if the grave lingers near them.
3. **Eyes of the Beyond:** Their eyes become unnervingly different, such as:
 - o Pupils shaped like hourglasses.
 - o A faint glow of silver, white, or pale gold.
 - o Eyes that seem to reflect spectral shapes or faint mists when stared into.
4. **Scar of Death:** The wound or injury that caused their death may remain visible but inert. For example:
 - o A faint, blackened scar across their chest where a blade struck.
 - o A ghostly burn mark that doesn't cause pain but never fades.
 - o A handprint on their throat or chest, resembling skeletal fingers.
5. **Unnatural Stillness:** The character moves with a preternatural grace or calm, as if their heart no longer beats. Small animals might shy away from their presence.

Behavioral or Psychological Changes

1. **Grave Speech:** Their voice may gain a deeper, resonant quality, as if echoing from beyond the grave. When invoking the Deathwarden's power, their words might carry ghostly whispers.
2. **Morbid Connection:** The character might instinctively know the state of nearby souls or desecrated corpses. For example:
 - o They sense when someone is close to death.
 - o They feel discomfort in the presence of undeath or desecrated ground.
3. **Death's Calm:** Having experienced death, the character is unshakable in the face of danger. They might become immune to being frightened or unnerved by death-related effects.
4. **Visions of the Dead:** The character occasionally sees fleeting glimpses of spirits or hears the whispers of the departed. Whether these are warnings, guidance, or echoes of the Deathwarden's will is up to interpretation.

Magical or Spiritual Manifestations

1. **Mark of the Deathwarden:** A sigil of the Deathwarden (such as an hourglass or a wreath of black and white roses) appears somewhere on their body, glowing faintly when they invoke their pact's power.
2. **Undying Body:** The character's body shows signs of resistance to mortal frailty:
 - o Their wounds knit together more quickly, leaving faint ghostly scars.
 - o They can go longer without food, water, or sleep, as if their body is sustained by something beyond life.
3. **Shadowed Aura:** A faint, ghostly aura surrounds them when they use their abilities, such as:
 - o Shadows lengthening unnaturally.
 - o A faint mist or spectral hands reaching out.
 - o The sound of a tolling bell or distant whispers accompanying their magic.
4. **Undead Recognition:** Undead creatures instinctively react to the character's presence. Some may avoid them out of fear of their connection to the Deathwarden, while others might view them as a rival or a threat.

Roleplaying Implications

- **Alienation from Life:** The character might feel disconnected from the living due to their death and return. Mortals may instinctively distrust them or feel uneasy in their presence.
- **Burden of Immortality:** Knowing they cannot die until their pact is fulfilled could lead to feelings of frustration, guilt, or even a growing desire for release.
- **Haunted by the Dead:** The spirits of the souls they've failed to release might linger around them, visible only to the character, acting as reminders of their unfinished task.
- **Symbol of Hope and Fear:** To allies, they may be a symbol of strength, a person who overcame death. To enemies, they might seem an unrelenting force, a walking herald of death itself.
